

Capability Statement

Satellite Energy Consulting is an independent oil and gas consultancy. We are committed to providing the highest level of commercial insight and technical excellence to our clients. We work closely with companies we support and compliment their teams to enable technical and strategic decisions to be made with greater confidence. Satellite Energy provides global experience of upstream project management and analysis combined with a broad range of experience in the oil and gas industry.

Satellite Energy is proud of the strategic analysis and insights it provides to its customers. In addition, as project manager, we can also arrange the full range of upstream commercial and development engineering and analyses including:
